

Benefits of Public-Private Innovation Network

The commercialization process utilized by Visage Energy and SRI combines Macro and Micro Level views in order to reduce the duration and risk of the effort

Macro Focus → Visage Energy

- Decrease time to deployment by EARLY dialog with the ecosystem
- “Internet” of developers, deployers, regulators, and stakeholders leverages Federal, State, Private efforts
- “Internet” of investors facilitates syndicated funding

Macro Focus → SRI

- Common language enables dialogue between all members of the network
- Ensures multi-institutional, multi-national teams remain on-track
